

# **Why Orlando Area Residents Should Have Their Trees Trimmed**

## **Tree Trimming Objectives**

Tree trimming services are one of the most essential maintenance practices for you to be familiar with in professional tree care. Essentially, there are two objectives in trimming trees and shrubs. Maintenance trimming services protect or improve your trees' structure and overall health. Hazard reduction tree trimming identifies visible concerns and potential risks in your trees and addresses specific dangers in order to maximize tree safety. Tree care professionals assess your tree trimming needs and take special care to enhance appearance, structural integrity and tree safety in your landscape. Tree Work Now has Certified Arborists on call in both Orlando and Daytona to advise you on the proper structural trimming of your particular trees.

## **Tree Trimming Service Benefits**

Your trees and shrubs benefit from trimming services in a variety of ways. Trimming trees for structural enhancement is achieved through young tree trimming, also known as developmental tree trimming service. This form of tree trimming is the most important procedure for your new plantings. It helps to ensure structural integrity and a favorable branch architecture. Furthermore, proper tree trimming of specimens while they are young reduces your potential to experience costly problems, such as major structural support issues, as your landscape matures.

Safety audits and storm damage prevention trimming services are crucial to minimizing danger and helping to prevent damage caused by falling limbs. Trees along your driveway, pedestrian paths, and surrounding buildings are of particular concern. Tree trimming is also a good idea for any of your trees with low-hanging branches that might cause interference with vehicular and pedestrian traffic.

Tree trimming service for health removes broken, diseased, or dead branches in order to prevent decay-producing fungi from infiltrating and infecting other areas of your tree. Occasionally, it is necessary to remove live branches to increase exposure to sunlight and improve air circulation within the canopy.

Vista tree trimming increases your landscape value and emphasizes beauty by creating visual access to picturesque scenes and natural elements such as valleys, lakes and rivers. Vista tree trimming service makes the most of views surrounding your landscape, while maintaining your desired level of privacy.

Restorative tree trimming and tree trimming services for appearance are essential for enhancing the beauty of feature trees and formal plantings. When the characteristic form of your trees has deteriorated, we recommend aesthetic tree trimming service by a professional tree care company.

The estimators at Tree Work Now serve the Greater Orlando Area and would be happy to take a walk around your cherished property with you and offer at no charge their professional recommendations regarding the trimming of your trees.
